Venue: Function Room, Salisbury YMCA, 41 Salisbury Road,
Tsim Sha Tsui, Kowloon, Hong Kong

Course Purpose and Description:

The Hong Kong Continence Society Limited has invited the world renowned expert in Continence Care, Dr. Paul Abrams, Secretary General of International Continence Society to conduct the First Hong Kong Urodynamic Workshop.

With the increasing awareness of care of urinary incontinence and various urination disorders like BPH in male in this region, there is widespread demand for the use of urodynamics. This urodynamic workshop aims to provide health care professionals the most updated development in the knowledge and skills in the application of urodynamics studies in the investigation and management of various voiding disorders.

The workshop will suit both the beginners and those who have had some practical experience in the continence care and urodynamics. It will be suitable for those doctors working in Urology, Urogynaecology and Geriatrics. It will also be suitable for nurses, allied health professionals e.g. physiotherapist, who are involved in the care of incontinence patients.

This intensive 2-day workshop will provide an intensive and in-depth experience in the theoretical aspects of urodynamic study, international standards in measurement, practical tips and videodemonstration of urodynamics case discussion. Participants will be able to apply the use of urodynamics in the assessment of lower urinary tract disorders after the workshop.

Workshop Content

Day 1 (12/11/99 Friday)

Morning

- Assessment of lower urinary tract function
- Theoretical Aspect of Urodynamic Study
